1. Flight_Delay_MTDNN_Paper_humanized.pdf

Overall similarity: 100.00% | Cosine: 100.00% | Exact: 100.00% | Partial: 100.00% | Unique: 0.00%
Classification: HIGH

Exact matches:

"joint flight delay status operational cause attribution using" | target tokens 0-8
"flight delay status operational cause attribution using multi" | target tokens 1-9
"delay status operational cause attribution using multi task" | target tokens 2-10
"status operational cause attribution using multi task deep" | target tokens 3-11
"operational cause attribution using multi task deep neural" | target tokens 4-12
"cause attribution using multi task deep neural network" | target tokens 5-13
"attribution using multi task deep neural network ieee" | target tokens 6-14
"using multi task deep neural network ieee standard" | target tokens 7-15
"multi task deep neural network ieee standard academic" | target tokens 8-16
"task deep neural network ieee standard academic paper" | target tokens 9-17
"deep neural network ieee standard academic paper format" | target tokens 10-18
"neural network ieee standard academic paper format aviation" | target tokens 11-19
"network ieee standard academic paper format aviation analytics" | target tokens 12-20
"ieee standard academic paper format aviation analytics group" | target tokens 13-21
"standard academic paper format aviation analytics group keywords" | target tokens 14-22
"academic paper format aviation analytics group keywords multi" | target tokens 15-23
"paper format aviation analytics group keywords multi task" | target tokens 16-24
"format aviation analytics group keywords multi task learning" | target tokens 17-25
"aviation analytics group keywords multi task learning deep" | target tokens 18-26
"analytics group keywords multi task learning deep neural" | target tokens 19-27
"group keywords multi task learning deep neural networks" | target tokens 20-28
"keywords multi task learning deep neural networks flight" | target tokens 21-29
"multi task learning deep neural networks flight delay" | target tokens 22-30
"task learning deep neural networks flight delay prediction" | target tokens 23-31
"learning deep neural networks flight delay prediction pytorch" | target tokens 24-32
"deep neural networks flight delay prediction pytorch bts" | target tokens 25-33
"neural networks flight delay prediction pytorch bts dataset" | target tokens 26-34
"networks flight delay prediction pytorch bts dataset delay" | target tokens 27-35
"flight delay prediction pytorch bts dataset delay attribution" | target tokens 28-36
"delay prediction pytorch bts dataset delay attribution entity" | target tokens 29-37
"prediction pytorch bts dataset delay attribution entity embeddings" | target tokens 30-38
"pytorch bts dataset delay attribution entity embeddings introduction" | target tokens 31-39
"bts dataset delay attribution entity embeddings introduction flight" | target tokens 32-40
"dataset delay attribution entity embeddings introduction flight disruptions" | target tokens 33-41
"delay attribution entity embeddings introduction flight disruptions present" | target tokens 34-42
"attribution entity embeddings introduction flight disruptions present major" | target tokens 35-43
"entity embeddings introduction flight disruptions present major operational" | target tokens 36-44
"embeddings introduction flight disruptions present major operational bottleneck" | target tokens 37-45
"introduction flight disruptions present major operational bottleneck modern" | target tokens 38-46
"flight disruptions present major operational bottleneck modern commercial" | target tokens 39-47

"disruptions present major operational bottleneck modern commercial aviation" | target tokens 40-48
"present major operational bottleneck modern commercial aviation incurring" | target tokens 41-49
"major operational bottleneck modern commercial aviation incurring billions" | target tokens 42-50
"operational bottleneck modern commercial aviation incurring billions dollars" | target tokens 43-51
"bottleneck modern commercial aviation incurring billions dollars annual" | target tokens 44-52
"modern commercial aviation incurring billions dollars annual losses" | target tokens 45-53
"commercial aviation incurring billions dollars annual losses through" | target tokens 46-54
"aviation incurring billions dollars annual losses through extra" | target tokens 47-55
"incurring billions dollars annual losses through extra fuel" | target tokens 48-56
"billions dollars annual losses through extra fuel burn" | target tokens 49-57
"dollars annual losses through extra fuel burn crew" | target tokens 50-58
"annual losses through extra fuel burn crew rescheduling" | target tokens 51-59
"losses through extra fuel burn crew rescheduling passenger" | target tokens 52-60
"through extra fuel burn crew rescheduling passenger compensation" | target tokens 53-61
"extra fuel burn crew rescheduling passenger compensation while" | target tokens 54-62
"fuel burn crew rescheduling passenger compensation while recent" | target tokens 55-63
"burn crew rescheduling passenger compensation while recent advances" | target tokens 56-64
"crew rescheduling passenger compensation while recent advances machine" | target tokens 57-65
"rescheduling passenger compensation while recent advances machine learning" | target tokens 58-66
"passenger compensation while recent advances machine learning improved" | target tokens 59-67
"compensation while recent advances machine learning improved delay" | target tokens 60-68
"while recent advances machine learning improved delay forecasting" | target tokens 61-69
"recent advances machine learning improved delay forecasting conventional" | target tokens 62-70
"advances machine learning improved delay forecasting conventional ap" | target tokens 63-71
"machine learning improved delay forecasting conventional ap proaches" | target tokens 64-72
"learning improved delay forecasting conventional ap proaches suffer" | target tokens 65-73
"improved delay forecasting conventional ap proaches suffer fundamental" | target tokens 66-74
"delay forecasting conventional ap proaches suffer fundamental design" | target tokens 67-75
"forecasting conventional ap proaches suffer fundamental design flaw" | target tokens 68-76
"conventional ap proaches suffer fundamental design flaw treat" | target tokens 69-77
"ap proaches suffer fundamental design flaw treat delay" | target tokens 70-78
"proaches suffer fundamental design flaw treat delay prediction" | target tokens 71-79
"suffer fundamental design flaw treat delay prediction isolated" | target tokens 72-80
"fundamental design flaw treat delay prediction isolated single" | target tokens 73-81
"design flaw treat delay prediction isolated single task" | target tokens 74-82
"flaw treat delay prediction isolated single task problem" | target tokens 75-83
"treat delay prediction isolated single task problem existing" | target tokens 76-84
"delay prediction isolated single task problem existing models" | target tokens 77-85
"prediction isolated single task problem existing models typically" | target tokens 78-86
"isolated single task problem existing models typically predict" | target tokens 79-87
"single task problem existing models typically predict either" | target tokens 80-88
"task problem existing models typically predict either binary" | target tokens 81-89
"problem existing models typically predict either binary delay" | target tokens 82-90
"existing models typically predict either binary delay occurrence" | target tokens 83-91
"models typically predict either binary delay occurrence 15" | target tokens 84-92
"typically predict either binary delay occurrence 15 minutes" | target tokens 85-93
"predict either binary delay occurrence 15 minutes estimate" | target tokens 86-94
"either binary delay occurrence 15 minutes estimate delay" | target tokens 87-95
"binary delay occurrence 15 minutes estimate delay duration" | target tokens 88-96

"delay occurrence 15 minutes estimate delay duration ignoring" | target tokens 89-97
"occurrence 15 minutes estimate delay duration ignoring underlying" | target tokens 90-98
"15 minutes estimate delay duration ignoring underlying operational" | target tokens 91-99
"minutes estimate delay duration ignoring underlying operational cause" | target tokens 92-100
"estimate delay duration ignoring underlying operational cause ii" | target tokens 93-101
"delay duration ignoring underlying operational cause ii literature" | target tokens 94-102
"duration ignoring underlying operational cause ii literature survey" | target tokens 95-103
"ignoring underlying operational cause ii literature survey recent" | target tokens 96-104
"underlying operational cause ii literature survey recent advances" | target tokens 97-105
"operational cause ii literature survey recent advances flight" | target tokens 98-106
"cause ii literature survey recent advances flight delay" | target tokens 99-107
